

2-Digit Subtraction With Regrouping

Name: _____

Subtract each pair of 2-digit numbers. Some need regrouping (borrowing) – work it out on scratch paper first!

$$\begin{array}{r} 42 \\ - 17 \\ \hline \square\square \end{array}$$

$$\begin{array}{r} 53 \\ - 26 \\ \hline \square\square \end{array}$$

$$\begin{array}{r} 81 \\ - 39 \\ \hline \square\square \end{array}$$

$$\begin{array}{r} 64 \\ - 28 \\ \hline \square\square \end{array}$$

$$\begin{array}{r} 95 \\ - 47 \\ \hline \square\square \end{array}$$

$$\begin{array}{r} 72 \\ - 35 \\ \hline \square\square \end{array}$$

Think together

Look at the ones column first – do we have enough to subtract, or do we need to borrow a ten?
